Marie Curie (Kids Can Read Series, Level 3)

Synopsis

Meet Marie Curie --- Nobel laureate and world famous scientist. Marie was the first woman to win the world's top science prize --- and the first person to win it twice. The story of her discoveries, including the metals polonium and radium, and her contribution to the study of radiation is told in level-appropriate language and detailed illustrations. This Level 3 reader contains longer, more complex stories and sentences, more challenging vocabulary, language play and minimal repetition.

Book Information

Age Range: 6 - 8 years

Grade Level: 1 - 3

Customer Reviews

Not only encourages reading, but also an interest in history and science. I like to have my kids read the Kids Can Press biographies because it gets them thinking about what they can do when they grow up.

I pulled this book from the university library shelves as I was searching for a good example of a children's biography. For the photobiography genre, it is the best I've seen. The layout and design are excellent. It is informational, engaging and inviting. The layout breaks down a potentially boring subject and bridges the gap between dated photographs and modern sensibilities. This book is a good choice both for casual reader and student seeking information for a report.

I purchased this book and several others plus various science toys/prog.and a lab coat,for a birthday gift for a very special,bright 6 year old girl.She loved them all and it seems to spark a bit of interest.Fun and Love.

I teach 6th grade reading. This book is perfect for the classroom library. Students need to read a variety of non-fiction. I have found that most students love reading biographies. This is a must buy for the classroom.

is a gift for my 7 year old granddaughter. i believe is a good reader that will challenge her reading skills, but is not so difficult that it will frustrate her.

This is one of many wonderful books in this series. Important for both girls and boys to read. Highly recommended
