Solar System: A Journey To The Planets And Beyond (3-D Explorer)

Synopsis

With this amazing pop-up guide, young astronomers embark on a spectacular 3-D tour of the solar system, from the infernal surface of the sun to the deepest, darkest reaches of space. They explore each of the solar system's regions in detail; discover the planets, comets, and asteroids; experience the Apollo 11 lunar landing; hitch a ride on the International Space Station; and even traverse the dusty red surface of Mars. Filled with engaging and informative text, it's an out-of-this-world look at the mysteries of space.

Book Information

Hardcover: 32 pages

Publisher: Silver Dolphin Books; Ina Pop edition (August 11, 2009)

Language: English

ISBN-10: 1592237584

ISBN-13: 978-1592237586

Product Dimensions: 12.1 x 8.5 x 0.9 inches

Shipping Weight: 1.7 pounds

Average Customer Review: 4.6 out of 5 stars [See all reviews](#) (5 customer reviews)

Age Range: 7 and up

Grade Level: 1 and up

Customer Reviews

Bought this for my 7 year old who has been asking for a book about astronomy. She really likes it. The illustrations are beautiful and it is very informative. Only complaint is we wish it was a longer book.

This is an absolutely gorgeous and educational book. It is just fascinating and the children who read it are mesmerized. I highly recommend this book over many other solar system books for young children. Wow!

My son is 5 and was assigned a space project for his pre-k class. I ordered this book because for

some reason pop-up books always seem to stoke his interest more than a traditional illustrated book does. I found myself enjoying this book as much as he did and now know more space facts than I did when I was in school. I would highly recommend this for any child space enthusiast or for any parent wanting to get their child interested in astronomy.

Grandkids absolutely loved the books

Good information for my son.
