Egyptology: Search For The Tomb Of Osiris

Synopsis

Discover the wonders of ancient Egypt through a fascinating journal from a lost expedition — a treasure trove of fact and fantasy featuring a novelty element on every spread. Who can resist the allure of ancient Egypt — and the thrill of uncovering mysteries that have lain hidden for thousands of years? Not the feisty Miss Emily Sands, who in 1926, four years after the discovery of King Tut's tomb, led an expedition up the Nile in search of the tomb of the god Osiris. Alas, Miss Sands and crew soon vanished into the desert, never to be seen again. But luckily, her keen observations live on in the form of a lovingly kept journal, full of drawings, photographs, booklets, foldout maps, postcards, and many other intriguing samples. Here are just a few of EGYPTOLOGY's special features: — an extravagantly gilded cover, featuring a raised Horus hawk pendant with three encrusted gems — a playable game of Senet — ancient Egyptian checkers — including board, pieces, original-style dice, and rules — a souvenir booklet showing how to read simple hieroglyphs — a scrap of textured "mummy cloth" — a facsimile of the gilded mummy mask of King Tut — a gilded eye-of-Horus amulet with a "jewel" at the end Rich with information about life in ancient Egypt and peppered with Miss Sands's lively narration, EGYPTOLOGY concludes with a letter from the former Keeper of Antiquities at the British Museum, explaining which parts of this unique tale may be accepted as fact, which are guided by legend, and which reflect the author's delightful sense of fancy.

This book is full of fun and facts. Our son was given this book as a gift for his birthday. What a wonderful gift it was! We spend about half an hour at a time on a page. There are lots of "secrets" and pockets and even a game. The book pretends to be a mysterious manuscript dating to 1926 (or is it real?) and provides readers young and old with an imaginative tour of Egypt's mysteries. Its heavy pages have the feel of a well-made pop-up book and its storyline is absorbing. My son seems to scan around the pages and find something new every time we open the book. It's fun for him but, I enjoy it just as much. It reminds me of the fun adventure of Indiana Jones.

This book is great. I got it for my sons and I am the one who stayed up late reading it. It is full of fun discoveries, and good information to use as a teaching tool for my kids. I'll tell them its the real journal of my aunt (hey, at 4 they still want to believe its true). The design of the book and the illustrations are beautiful, it will be something we read over and over again. Got it along with Dragonology which my sons LOVE. Amazing that this can be had for only 12 or 13\$!

I am 11 and loved this book. It is full of mystery and fun. Before I got glasses reading hurt my eyes, but this one was so good I read it anyway. I liked this book because it is not written like normal books; it was informative, and easy to read. It has paragraphs scattered around the page like a journal. If you liked this book you should probably read the whole series: -dragonology-wizardology.

I bought this book for myself and i have to say it is absoutely awesome! I stayed up for 2 hourse reading every detail of this exciting "long-lost" diary. The games Senet is very fun and the "papyrus" looks very real! The cover looks like it is made out of gold and is very cool. I enjoyed this book and reccommend it to everyone.- Sophi :-)

I found this book at a bookfair, and I had to find it on , who of course has the best deal. I had to force myself not to go through the book before giving it to my six-year-old daughter so that we could enjoy it together. This couldn't be a better way for children to learn. It's hands-on, tactile involvement makes the Egypt experince come alive and makes it real to children. I would recommend this to anyone who wants to enhance their children's love of history, travel, and/or Egypt. I work in a school and I've seen many books. This one sets a standard.

This is just another great book in a great series of books. If you haven't collected them yet, I recommend it. Dragonology, Egyptology and Wizardology along with now Dragonology Handbook, Egyptology Handbook and HOPEFULLY to come Wizardology Handbook. They are all beautifully done, filled with hidden surprises and lots of things to do -- an adult treat childstyle.

I love this entire series of books - my first was Dragonology. These are very much in the spirit of Nick Bantock's Griffin & Sabine series, though these deal with some real life and fantastical subjects. This is not hard-core info but pure delight with a little education thrown in. You'll probably want the whole series (as it comes out) and if you have young people around they will delight in the series too!

Lovely book. After studying mythology and Egyptian culture in her sixth grade class, my 12 year old daughter was simply enchanted to see those places, people and things from a "personal perspective". It makes rather dry textbook history come to life. Highly recommend the book to anyone with an interest in Egyptian life.
